

**PATENT****Application # 09/736,430****Attorney Docket # 113592 (1014-087)****AMENDMENTS****AMENDMENTS TO THE CLAIMS**

1.-12. Cancelled

13. (Currently Amended) A system for synchronously delivering complementary data through a network, the system comprising:

a control unit operable to measure a first time-delay time associated with a first complementary data stream delivered to a first device and a second time-delay time associated with a second complementary data stream delivered to a second device, and synchronize the first ~~data~~-complementary data stream and the second complementary data stream by ~~causing at least one of~~ introducing a relative delay to which ever of the first complementary data stream and the second complimentary data stream corresponds to a shorter delay time of the first delay time and the second delay time, to be delayed by at least a time equal the relative delay one half of to a difference between the first time-delay time and the second time-delay time;

the first device connected to the control unit through the network; and

the second device connected to the control unit through the network,;

wherein the first device is a vehicle navigation system and wherein the complementary data includes navigational video data delivered to the first device and supplementary data delivered to the second device.

14. (Original) The system of claim 13 wherein the supplementary data is audio data.

15. (Currently Amended) A system for synchronously delivering complementary data through a network, the system comprising:

a control unit operable to measure a first time-delay time associated with a first complementary data stream delivered to a first device and a second time-delay time

**PATENT****Application # 09/736,430****Attorney Docket # 113592 (1014-087)**

associated with a second complementary data stream delivered to a second device, and synchronize the first data complementary data stream and the second complementary data stream by introducing a relative delay to which ever of causing at least one of the first complementary data stream and the second complimentary data stream corresponds to a shorter delay time of the first delay time and the second delay time, the relative delay one half of to be delayed by at least a time equal to a difference between the first time-delay time and the second time-delay time;

the first device connected to the control unit through the network; and

the second device connected to the control unit through the network,

wherein the first device is a video monitor and wherein the complementary data includes video data delivered to the first device and subtitles delivered to the second device.

16.-38. (Cancelled)
